LAB03-TASK01: ARRAY

The municipal counsellor of your locality has requested your help to write an algorithm to calculate the mean value of the ambient temperature in your area. Calculate the temperature readings of a week in an array and then display mean temperature of the week.

Sample Run

Enter Temperature Reading of Day:1=1

Enter Temperature Reading of Day:2=-2

Enter Temperature Reading of Day:3=4

Enter Temperature Reading of Day:4=34

Enter Temperature Reading of Day:5=3

Enter Temperature Reading of Day:6=3

Enter Temperature Reading of Day:7=3

The Average Temperature of the week is = 6.57

For submission as Lab Attendance, please include the following:

1. LAB03-TASK01.c
2. Upload to UKMFolio
